

Metal Coatings

Quality Assurance Plan

Metal Coatings Quality Policy

Metal Coatings strives to be the best provider of Industrial Paint Systems and Commercial Blast Cleaning in preparation for those systems to be applied. Through the use of these guiding principles, everyone at Metal Coatings is accountable for fully satisfying our customers by meeting or exceeding their needs and expectations with best-in-class solutions and services. Our goal is 100% customer satisfaction 100% of the time.

Our Quality Policy is defined and strongly driven by the following management principles and behaviors:

- Build a mutually profitable relationship with our customers, ensuring their long-term success, through the understanding of their needs and the needs of their customers as well
- Achieve our commitments for quality, cost, and schedule
- Enhance the systematic research and use of best preventive practices at all levels and ensure reliable risk management
- Drive continual improvement and innovation based upon efficient business processes, well-defined measurements, best practices, and customer surveys
- Develop staff competencies, creativity, empowerment and accountability through appropriate development programs and show strong management involvement and commitment

Personnel Qualifications

Metal Coatings is a full-service industrial coating company specializing in industrial coating applications for a vast variety of project types.

Metal Coatings provides Industrial Painting Services for water resources projects and pipelines, wastewater treatment plants, fuel storage components, urban architecture, bridges, ship components, oil refineries, power plants, and other industrial structures.

Metal Coatings

Metal Coatings staff includes experienced abrasive blasters and applicators. Our abrasive blasters and applicators have gone through extensive internal and external training. Metal Coatings follows SSPC and NACE standards and procedures for training and certification of our abrasive blasters, applicators and NACE inspectors.

Metal Coatings through a Vendor partnership, offers NACE Certified Coatings Inspection Level III. Quality Assurance/ Quality Control (QA/QC) personnel are experienced and qualified to conduct all tests as required under the NACE Certified Inspector Program (NACE CIP). Our comprehensive Quality Assurance program covers management, personnel, job process, training, safety, environmental compliance, quality control, and maintenance. It is our policy to provide our clients with daily progress reports and daily QA/QC reports indicating the results of the inspections.

Our objective is to ensure that our clients receive the highest quality products and services from us. To that end, we insist on full compliance with NACE International, SSPC, ASTM and other industry-approved quality standards.

Trade Association Membership: NACE International – NACE ID 9058383

Facilities

Located in Magna, Utah Metal Coatings is situated on a 3.7 acre parcel with plenty of room for large projects. Paint systems are applied in an indoor, temperature controlled 25,000 sq/ft building. Our paint area boasts a negative air system which can circulates and filter the air up to 7 times per hour, which increases currying times. We have experience receiving oversize full semi-truck loads and have capacity to receive up to 10 tons in a single hoist.

Environmental Compliance

Metal Coatings is fully compliant with all regulatory agencies. We have been issued an Approval Order, also known as an Air Quality Permit from the Department of Environmental Quality of the State of Utah. We operate in compliance with VOC and HAP emitting material limitations.

Metal Coatings

Experience

Metal Coatings was founded to install Industrial Paint Systems and Commercial Blast Cleaning in preparation for those systems to be applied. We specialize in systems that include, but are not limited to Alkyds, Enamels, Epoxies, Zinks, Phenolics, Vinyl Esters Polymers, Tank Linings, and a variety of Corrosive Resistant Coatings. Our team has provided high quality, cost effective, environmentally compliant products for decades with combined experience of over 75 years.

Our quality control department ensures that every product receives the appropriate verification testing to ensure it meets the customers' needs before it is shipped. Metal Coatings is committed to provide our customers with excellent service

Project Specific Coating System

Macropoxy 646 from Sherwin Williams

Macropoxy 646 fast cure epoxy is a high solids, high build, fast drying, polyamide epoxy designed to protect steel and concrete in industrial exposures. Ideal for maintenance painting and fabrication shop applications. The high solids content ensures adequate protection of sharp edges, corners, and welds. This product can be applied directly to marginally prepared steel surfaces and hot substrates up to 250°F/120°C. Low VOC, Chemical resistant, Low Odor, Abrasion resistant, Outstanding application properties, Meets Class A requirements for slip Coefficient, 0.36 @ 6 mils / 150 microns dft (Mill White only)

The Macropoxy 646 paint system is the most common paint system that Metal Coatings applies. Our current 5 year average shows that we apply more than 20,000 sq/ft per month of this product.
